

US Serial No. 10/525982

Page 3 of 14

In the Claims:

- 1.(currently amended)      A water soluble container containing a concentrate composition comprising:
- (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof;
  - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether and propylene glycol methyl ether;
  - (c) optionally, but desirably at least one alkanolamine; and
  - (d) optionally, up to about 10% wt. of one or more conventional additives selected from coloring agents, fragrances and fragrance solubilizers, further surfactants, pH adjusting agents and pH buffers, optical brighteners, opacifying agents, hydrotropes, anti-oxidants, and preservatives;
- wherein said composition contains no more than 12.5%wt. water and  
wherein the water soluble container is adapted to form a hard surface cleaning composition via dissolution of the water soluble container and its contents in a container containing an amount of water.
- 2.(previously presented)      A water soluble container according to claim 1 containing a concentrate composition wherein said composition contains in excess of 7.5%wt. water, but not more than about 12.5%wt. water.
- 3.( previously presented)      A water soluble container according to claim 1 containing a concentrate composition which contains no more than 5.5%wt. water.
- 4.( previously presented)      A water soluble container containing a concentrate composition according to claim 1 wherein the concentrate composition comprises (c) at least one alkanolamine.

US Serial No. 10/525982

- 5.( previously presented)      A water soluble container containing a concentrate composition according to claim 1 wherein the concentrate composition exhibits a flash point of at least 105°F.
- 6.( canceled)
- 7.( previously presented)      A water soluble container containing a concentrate composition according to claim 1 wherein the concentrate composition comprises:
- (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether and propylene glycol methyl ether and optionally comprises a C<sub>1</sub>-C<sub>6</sub> glycol, or a C<sub>1</sub>-C<sub>6</sub> monohydric alcohol.
- 8.(original)      A water soluble container containing a concentrate composition according to claim 7 wherein the concentrate composition comprises
- (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether, propylene glycol methyl ether and a C<sub>1</sub>-C<sub>6</sub> monohydric alcohol.
- 9.( currently amended)      A water soluble container containing a concentrate composition according to claim 1 wherein
- the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant or and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.
- 10.(currently amended)      A water soluble container containing a concentrate composition according to claim 9 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists

US Serial No. 10/525982  
Page 5 of 14

essentially of a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant or and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

11.( currently amended) A water soluble container containing a concentrate composition according to claim 1 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises at least one nonionic surfactant based on an ethoxy/propoxy block copolymer, further in conjunction with at least one nonionic surfactant based on an ethoxylated fatty alcohol ~~alcohols~~, and wherein the concentrate composition further includes as a further surfactant an alkoxylated ~~alkoylated~~ quaternary ammonium compound.

12.( currently amended) A water soluble container containing a concentrate composition according to claim 1 wherein the  
(a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of at least one nonionic surfactant based on an ethoxy/propoxy block copolymer, further in conjunction with at least one nonionic surfactant based on an ethoxylated fatty alcohol ~~alcohols~~,  
and wherein the concentrate composition further includes as a further surfactant an alkoxylated ~~alkoylated~~ quaternary ammonium compound.

13. (previously presented) The water soluble container according to claim 1 which comprises a thermoformed or injection molded water soluble polymer.

14.(original) The water soluble container according to claim 13 wherein the water soluble polymer is poly(vinyl alcohol).

US Serial No. 10/525982

15.( previously presented) A process for treating a surface, particularly a hard surface especially one or more selected from polished metal surfaces, glass and mirrors in need of cleaning, comprising the process steps of:

placing a water soluble container containing a concentrate composition according to claim 1 into a larger quantity of water;

allowing the water soluble container to dissolve in the water to form a cleaning solution;

and applying an effective amount of the solution to the surface in need of treatment.

16.( previously presented) A water soluble container containing a concentrate composition according to claim 3 wherein the concentrate composition comprises (c) at least one alkanolamine.

17.(previously presented) A water soluble container containing a concentrate composition according to claim 3 wherein the concentrate composition exhibits a flash point of at least 105°F.

18.( previously presented) A water soluble container containing a concentrate composition according to claim 3 wherein the (b) the at least one organic solvent having a solubility in water of at least 4%wt. is present in an amount of at least 75%wt.

19.( previously presented) A water soluble container containing a concentrate composition according to claim 3 wherein  
the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

US Serial No. 10/525982  
Page 7 of 14

20.( previously presented) A water soluble container containing a concentrate composition according to claim 19 wherein

the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

21.(new) A water soluble container containing a concentrate composition comprising:

- (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof;
  - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt.;
  - (c) optionally, but desirably at least one alkanolamine; and
  - (d) optionally, up to about 10% wt. of one or more conventional additives selected from coloring agents, fragrances and fragrance solubilizers, further surfactants, pH adjusting agents and pH buffers, optical brighteners, opacifying agents, hydrotropes, anti-oxidants, and preservatives;
- wherein said composition contains in excess of 7.5%wt. water, but not more than about 12.5%wt. water.
